Let's grow together

Electric Counterbalance Forklift Truck 3000-3800kg

LI-ION TECHNOLOGY

- Modular battery design for flexible battery capacity adjustment
- One standard battery module allows for individual use and pairwise combination
- Lithium technology with opportunity charging and zero maintenance
- High travelling and lifting speed and strong gradeability for maximum efficiency
- 150mm ground clearance and big tyres to work on all surfaces
- Improved key components: mast, lights, seat, display and controls

Modular Li-ion battery design for maximum flexibility

The X5 series features a modular Li-ion battery design and offers one standard lithium battery module of 280Ah. The truck can accommodate up to two battery modules and through pairwise combination, you can get one more battery capacity 560Ah. This allows for flexibly adjusting battery capacities to meet different application requirements from light to heavy duties.

Optimize stock management

Modular battery design enables offering medium to high battery capacities in one truck to fit various endurance demands. This helps dealers reduce fixed assets, manage stockpile effectively and respond quickly to different users needs by simply installing the second battery module.

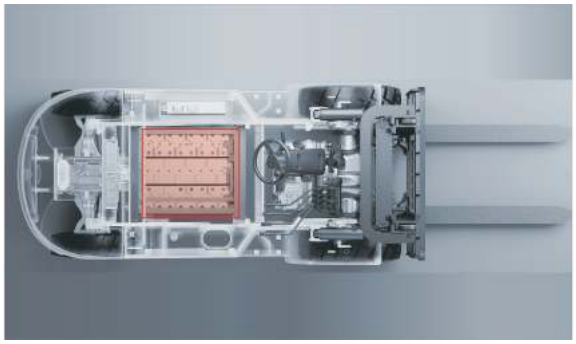

Longer endurance in peak season

The user needs in terms of daily usage of the truck may change over the years or there may be a peak during harvesting or on a specific season. The modular battery system makes it easy to retrofit an additional battery, providing additional sales or short-term rental opportunities.

Ensure uninterrupted operation

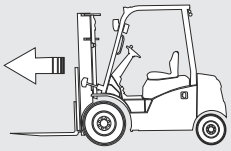

Double batteries mean double guarantee. When one battery is down, another one can seamlessly power the X5 truck, minimizing downtime risks associated with battery and ensuring continuous, smooth handling operation.

FEATURE

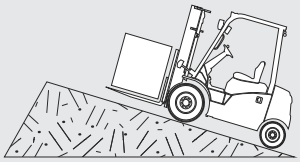

High performance for productivity boost

The X5 series demonstrates high performance comparable to EFL303S to enhance goods turnover efficiency.

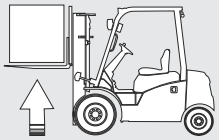

16/17km/h

Travel speed (laden/ unladen)

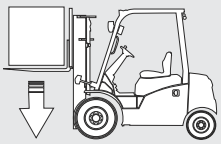

20/25%

Max. gradeability (laden/ unladen)

0.45/0.55m/s

Lifting speed (laden/ unladen)

0.54/0.44m/s

Lowering speed (laden/ unladen)

Lithium technology with opportunity charging

The X5 series is designed around the advantages of lithium technology and meets the requirements of sustainable development. It supports opportunity charging and zero maintenance to minimize downtime.

Higher ground clearance for all terrain challenges

The X5 series provides higher ground clearance of 150mm and big tyres, protecting the forklift from getting stuck on ramps, potholes and mud. It' s a workhorse to handle loads on all terrains.

Improved components for easy, safe and comfortable operation

The X5 series is equipped with improved components such as the new triplex mast with high visibility, the new seat with armrest, the new LED front lights, the wider brake pedal and the large LED display.
