EFLA251B

2500kg Li-ion Cushion Tyre Forklift Truck

Let's grow together

LI-ION TECHNOLOGY

- Small wheelbase, compact truck size and cushion tyres suitable for indoor applications
- Effortless and simple usage in narrow aisles and confined spaces
- Fast lifting and lowering speed for maximum efficiency
- High residual capacity of 1000kg at 6.55m for high utilization of racking systems
- 80V/460Ah Li-ion battery as option ensures productive operation and long runtime
- Enhanced lifting performance thanks to the optimized hydraulic valve
- Driving compartment with superior visibility and suspension seat allows comfort operation

CE

Manufacturer			EP
Model designation			EFLA251B
Drive			Electric
Load capacity	Q	kg	2500
Load center distance	c	mm	500
Service weight		kg	4510
Retracted mast height	h1	mm	2110
Lift height	h3	mm	4800
Height, mast extended	h4	mm	5838
Length to face of forks	l2	mm	2329
Overall width	b1/b2	mm	1065
Fork dimensions	s/e/l	mm	40/122/1070
Turning radius	Wa	mm	1990
Travel speed, laden/unladen		km/h	13/14
Lifting speed, laden/unladen		m/s	0.61/0.64
Lowering speed, laden/unladen		m/s	0.5/0.5
Max. gradeability, laden/unladen		%	15/16
Drive motor rating S2 60 min		kW	8.5
Battery voltage/nominal capacity		V/Ah	80/230

FEATURE

Compact design and cushion tyres for indoor operations

With a compact wheelbase of 1485mm and an overall width of 1065mm, the EFLA251B model achieves an impressive turning radius of 1990mm, which is 15% smaller than the general purpose EFL253 for indoor and outdoor use. EFLA251B' s dimension allows it to be operated effortlessly in narrow aisles. The cushion tyres are best on smooth concrete surfaces and also help with handling in tight spaces.

Li-ion Technology: High energy in a compact size and zero emission

EFLA251B is equipped with 80V/230Ah Li-ion battery and 80V/460Ah Li-ion battery as an option, which offers numerous benefits over lead-acid **electric trucks** trucks. Li-ion batteries have a high energy density, allowing them to store a significant amount of energy in a relatively small and lightweight body. This makes them ideal for applications where space and weight constraints are crucial.

More importantly, the zero-emission feature of Li-ion battery makes EFLA251B the golden choice for indoor use as Li-ion trucks emits no toxic gas or chemicals.

Lift Higher and Faster

The lifting and lowering speeds have been improved thanks to a larger hydraulic oil hose and optimized valve design, enhancing overall operational efficiency.

EFLA251B offers an optional four-stage mast with three cylinders that can reach up to 6550 mm, ensuring that even at heights of up to 6.55 meters, the forklift maintains a residual capacity of 1000 kg.

Ergonomics and superior visibility

Despite its compact size, EFLA251B does not compromise on operator comfort. The driving compartment is designed with ample space for ergonomic efficiency, featuring a standard suspension seat that allows for fatigue-free operation. EFLA251B have optimized visibility through improved cylinder layout providing the operator with a clear view of their surroundings.

The excellent heat regulation and the standard cushion tyres also contribute to noise reduction, creating a quieter working environment that enhances operator focus and comfort.

A dependable equipment prioritizing safety, efficiency and ease of maintenance.

EFLA251B incorporates several advanced features to ensure the well-being of the operator and the efficiency of operations:

Safety

Floor mat is carved to prevent slippage and enhance safety by providing better traction for the operator.

A speed control system comes as a standard function, ensuring safe turning and reducing the risk of tipping.

An optional mast buffer automatically slows down the lifting speed as the mast reaches the top, preventing abrupt stops and ensure smooth operation.

Easy Maintenance

Maintenance is made easy with a non-bolted front floor and a removable floor mat, allowing for quick repairs or parts replacement, ensuring minimal downtime and maximum productivity. Additionally, the incorporation of a bolted overhead guard (OHG) design further simplifies the maintenance process, with bolted design allowing easy disassembly and reassembly, facilitating access to components that may require servicing or replacement.

Less Noise, More Comfort

The motor controller is strategically placed beside the counterweight for optimal heat regulation, eliminating the need for extra fans.

And more.....

The upgraded look of the forklift, with a rectangular shield-shape counterweight design that complements the overall robust style, makes it not only functional but also aesthetically pleasing.

Additionally, the EFLA251B offers an optional clamp for added versatility. The clamp interlock safety function ensures that the control switch must be activated to operate the clamp, adding an extra layer of safety.
